Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15, drawn to methods for treating Parkinson's disease comprising administering levodopa and a partial glycine agonist and, optionally, a peripheral decarboxylase inhibitor, classified in various subclasses of class 514, depending on the partial glycine agonist and optional peripheral decarboxylase inhibitor contemplated.
- II. Claims 16-28, drawn to methods for increasing the therapeutic index of levodopa comprising administering levodopa and a partial glycine agonist, optionally, a peripheral decarboxylase inhibitor, classified in various subclasses of class 514, depending on the partial glycine agonist and optional peripheral decarboxylase inhibitor contemplated.
- III. Claims 29-42, drawn to a kit comprising a partial glycine agonist, optionally further comprising levodopa and/or a peripheral dopa decarboxylase inhibitor, and a method of treating Parkinson's disease thereof, classified in various subclasses of class 514, depending on the partial glycine agonist and optional peripheral decarboxylase inhibitor contemplated.

The inventions are distinct, each from the other, for the following reasons:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

Art Unit: 1614

the instant case the disclosed partial glycine agonist, cycloserine, may be used in the treatment of tuberculosis.

The Groups have acquired a separate status in the art as shown by their recognized, divergent subject matter. The searches required for each Group are not co-extensive. Each Group is capable of supporting a separate patent. Thus restriction for examination purposes, as indicated, is proper.

Applicants are advised that to be complete, the reply to this requirement must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Where restriction between product and process claims is required, and Applicants elect claims directed to the product, if a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after Final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicants are advised that the process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the Examiner before the patent issues. See MPEP § 804.01.

A telephone call to the attorney of record is not required where: 1) the restriction requirement is complex; 2) the application is being prosecuted *pro se*; 3) the Examiner knows from past experience that a telephone election will not be made. See MPEP 812.01.
